## Gettable Unknown Case Challenge

### Participate and You Could be a Winner!

**Resident Aaron Ross, MD** of UT Health Science Center in San Antonio will present this year's Gettable Unknown Cases. Though the cases will be challenging, they will not be impossible, so don't let intimidation keep you from participating. Partial credit will be given for answers on the right track, so that will make it easier to score well.

Submit your answers to the unknown cases, and you will have the chance to win a great prize as well as bragging rights as "one of the smartest radiologists at the meeting!" Your name will also be engraved on a plaque that will be displayed at all future TRS meetings. This year, we will have winners in two categories – a resident/fellow category and a practicing radiologist category.
